NearHub Board Key Feature

Powered by NearHubOS. Connect your teams and streamline your workflow.

Open System Based on AndroidOS

NearHubOS, built on the foundation of AndroidOS, is specifically designed to optimize touchscreen functionality. You can enrich your ideas through annotations, view multiple windows using split-screen mode, and initiate meetings with a single click.

*NearHub Board could also install Windows system via OPS.

Work with Loved Apps from Google Play and NearHub App Store

NearHubOS seamlessly integrates Android 11 runtime, enabling full support for the Google Play Store and your favorite touchscreen-friendly apps. That means easy and fast adoption throughout organizations with minimal support from IT teams.

Upgrade Your Home Entertainment with the Super Smart TV

NearHub offers a seamless transition from home office to home theater. You can enjoy effortless streaming with your favorite apps such as Youtube, Netflix and Hulu, and easily integrate your Apple TV and game consoles into the NearHub Board.

NearHub Board Key Feature

Room Solution. Immersive hybrid meeting experience with the all-in-one board.

Make Meetings Immersive Than Ever

With the beamforming microphone array and 4K AI camera, NearHub Board offers versatile camera modes including Gallery View, Speaker Tracking and Auto Framing to create more immersive hybrid meeting experience.

Compatible Across Conferencing Platforms

NearHub Board seamlessly integrates with your favorite meeting apps such as Microsoft Teams, Zoom, Google Meet, WebEx and so on. You can start an immersive conference call with just one click.

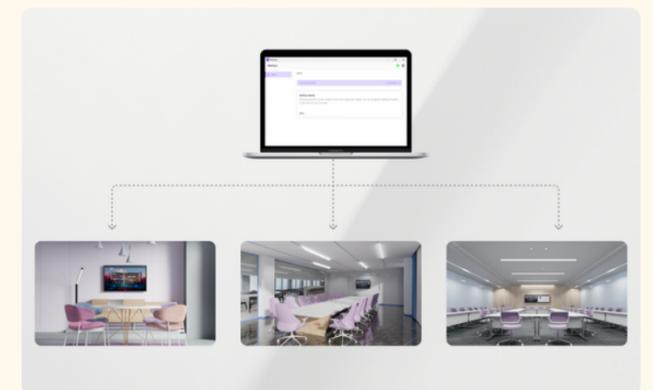

Make Sure Everyone is Heard Clearly

The deep learning model applied upon the generous 24-mic beamforming array filters out more than 300 noises, including typing, writing on the display, and air conditioning.

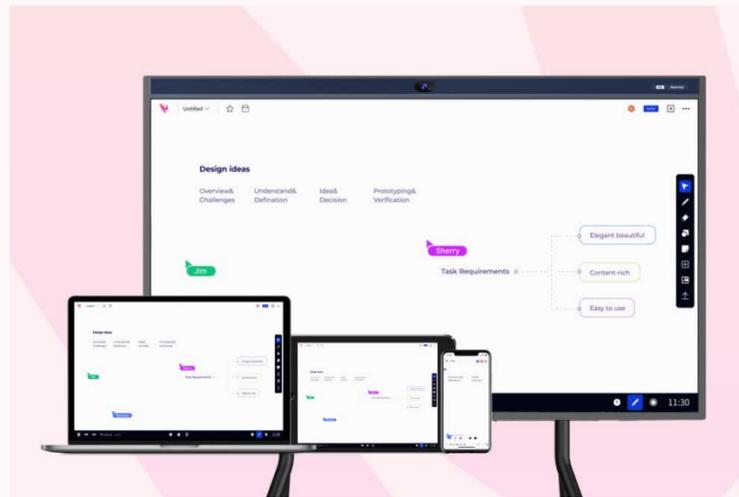

Instant Device Access and Management

IT teams can easily access and manage all NearHub boards instantly through NearSync, which is the cluster device management tool. With the easy-to-use tool, IT teams can update device firmware, turn the screen on/off, install apps and deliver a message to all panels.

NearHub Board Key Feature

Whiteboard. Where hybrid teams collaborate across any device

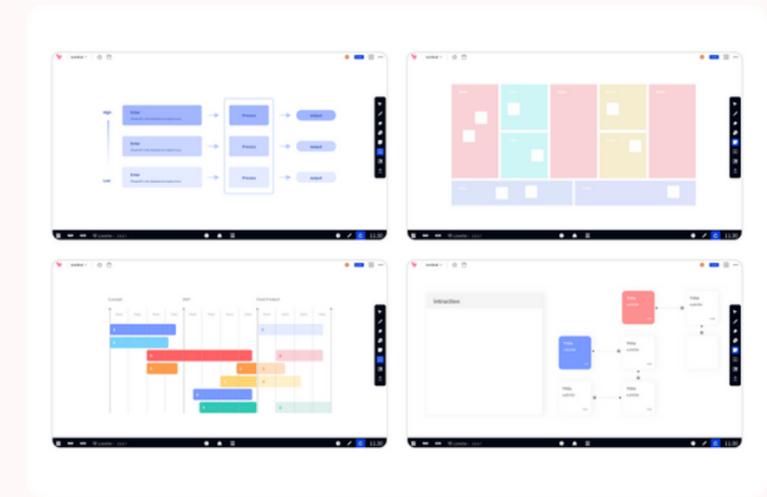

Ideate Together on An Infinite Canvas from Any Device

NearHub Canvas offers multi-device support, allowing seamless collaboration on a NearHub Board, web browser, tablet, or phone from anywhere. Collaborators can add feedback and ideas using comments to drive team discussions effectively.

Unleash Your Creativity with Freehand Stylus and Brush Mode

Equipped with 20/40 touch points, the NearHub Board supports 4 people writing simultaneously with the passive stylus and comes with a variety of pre-installed brush modes and graphic templates.

Get What You Want Faster from Templates Library

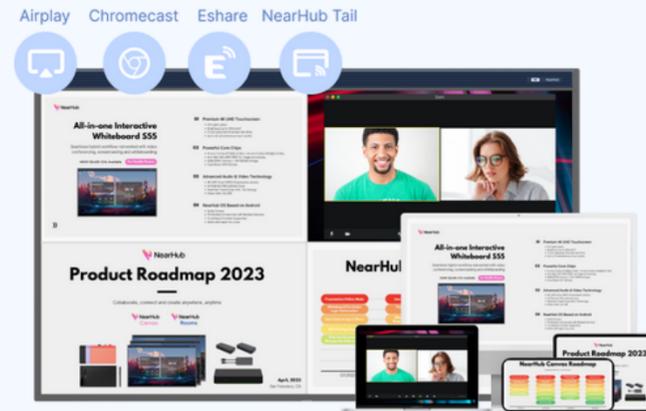

You can easily save time using hundreds of ready-to-use templates like Process Flowchart, Empathy Map and SWOT Analysis for common use cases and proven methods.

NearHub Board Key Feature

Presentation. Engage your audience with advanced features for presentation, annotation, and collaboration.

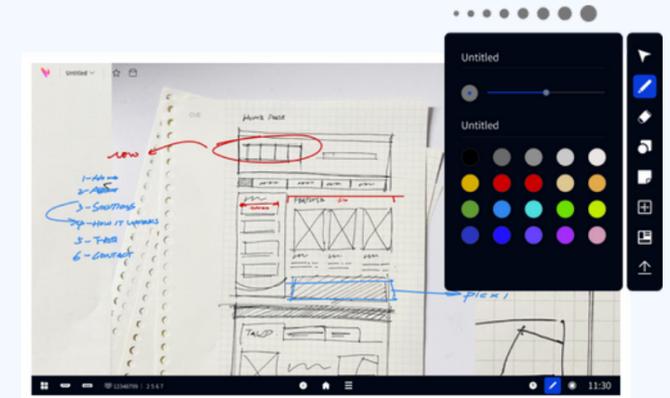

Frictionless Screencast as You Want

You can cast any files from any device—computer, tablet, or smartphone—to the NearHub Board with HDMI-in, USB-C ports, or wireless screen casting. Introducing our Dual Mode WiFi Module design, by enabling the AP mode, you can enjoy seamless screencasting even in a no-network environment.

Elevate Feedback and Comments with Smart Annotation

NearHub empowers you to elevate productivity by importing PDFs and images into the Canvas, allowing easy and seamless annotation directly on the files. Besides, you can also annotate on third-party apps and effortlessly share the collected annotations to the Canvas.

Unlock the Power of Multiscreen Meeting Experiences with NearHub

With Touchback function, mobile devices can be operated from the NearHub Board to manage writing, drawing, annotating and presenting.

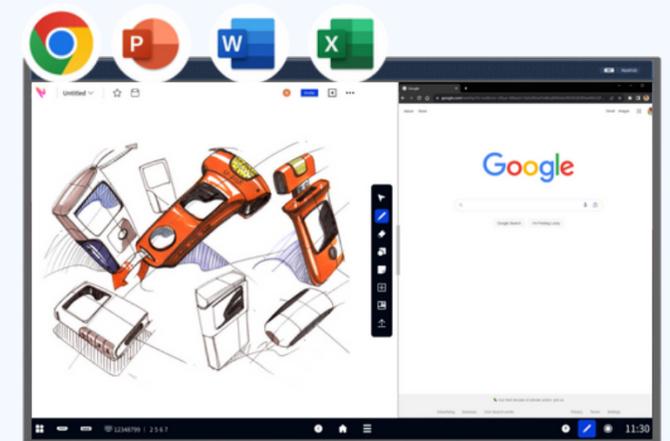

You can enhance the NearHub Board by connecting larger format LED display to HDMI out port of NearHub.

* Touchback function is available when you use eshare app or when you connect both HDMI and type-B ports of NearHub to your computer.

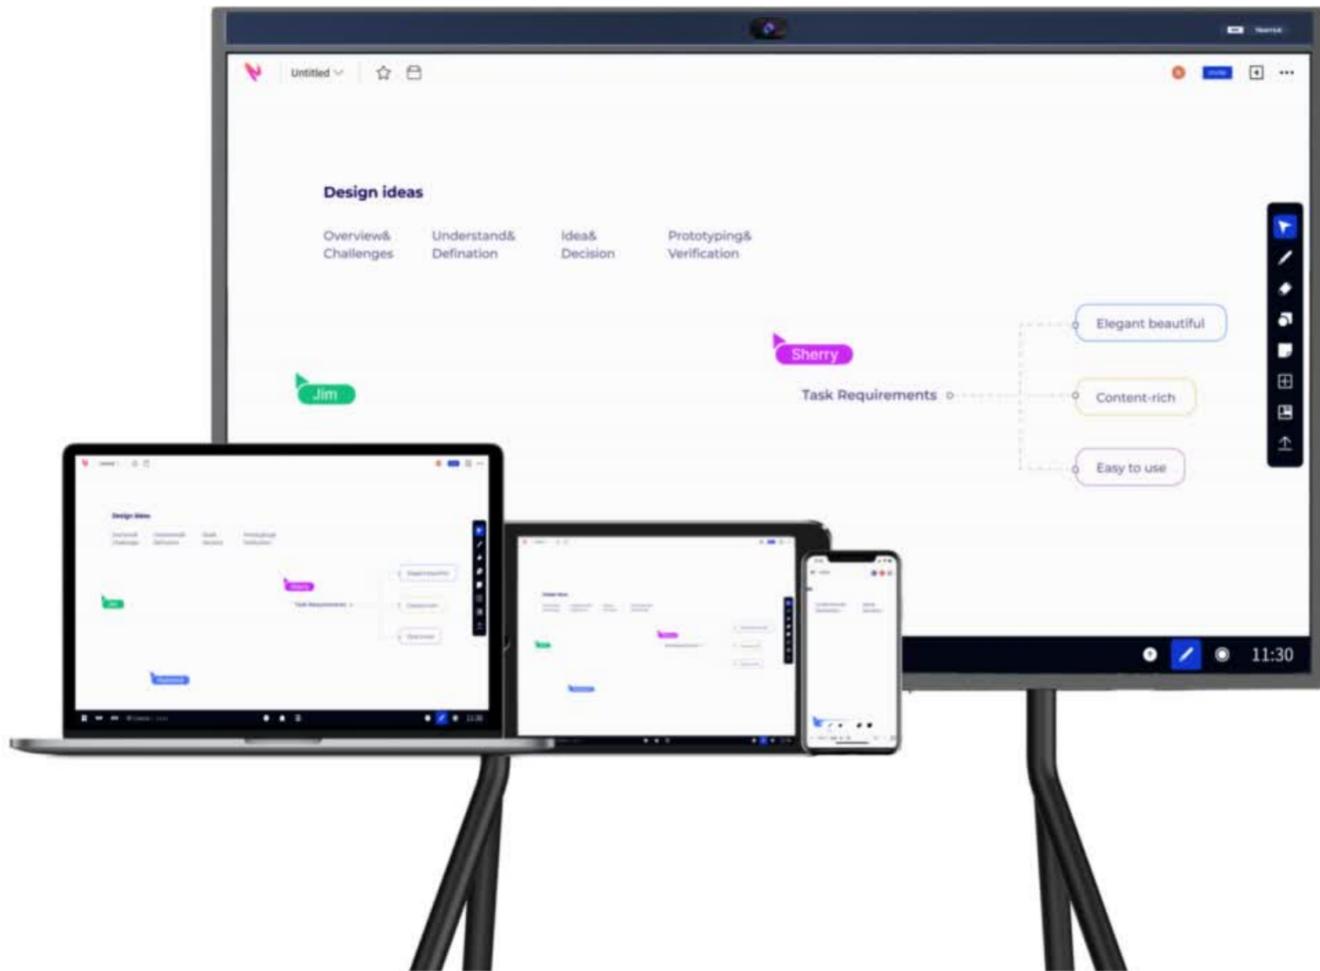

Split-screen View to Deliver Impactful Presentations

Choose the apps that best convey your message, whether you're presenting a sales report with PowerBI, a Marketing campaign with PowerPoint, or UX design with Figma. You can run two apps side by side for seamless multitasking and draw references from Chrome, YouTube, or other apps while you work.

NearHub Canvas

Collaborate Anywhere, Anytime

Brush mode

Use watercolor pencils, crayons, and markers to build your work and highlight your notes with ease.

Infinite canvas

Unleash your creativity on an infinite canvas. Build vertical and horizontal scroll infinite canvases based on your needs.

Templates

Start your work faster with pre-built templates. Save your time and effort by providing a solid foundation for your projects.

Cloud-based

Automatically save all discussions to the cloud in real time, no need to worry about losing any ideas anymore.

Multi-device support

Collaborate on the same canvas from a NearHub Board, computer, iPad, or phone in real time from anywhere.

Comment

Use comments, stickers, and emotions to add feedback and ideas to help drive discussions.

Enterprise-Grade Data Protection

The confidence you need to deploy at scale

Trusted computing with TPM 2.0

With Trusted Platform Module (TPM), the NearHub Board makes sure to encrypt user profiles and certificates, facilitate disk encryption, the list goes on.

Single sign-on authentication

NearHub ensures that only the right people and approved devices can access user's or team's content.

Dedicated user accounts

When working in a shared workspace, you can sign in to your dedicated account to stop unauthorized access to your apps or sensitive information.

Fleet management

Configure and manage your devices and users remotely from any web browser, IT admins can tailor the setup process to any team.

Over-the-Air updates

NearHub provides automatic security updates every 2-4 weeks to ensure you're working on the latest and most secure versions of NearHubOS.

SOC 2

Assurance to customers that NearHub has appropriate security measures and controls in place to protect data and ensure the overall integrity of services.

Trusted by 80,000+ Business Leaders and Educators

"Now we use the built-in WebEx software to hold meetings with Apple every day, which greatly improves the communication efficiency of both parties"

Frank Sun

General Manager at Secote

"A very powerful way to create a hybrid teaching solution. It's an active learning process that gets students engaged and gets them actively thinking, not just passively listening to material. "

Frank Bergdoll MA

Lead Instructor at Southern Alberta Institute of Technology

"NearHub turned out to be a great solution for me and for my business. I can work with more teams in a given week, reaching twice as many clients."

William Parker
